

I understand there is an effort to limit the content of XM (satelite)radio. I would just like to say that I am totally against this effort. I find satelite radio offers a great alternative to both AM and FM radio, and if they can offer quality local programs, I don't understand why there should be any objections. This is a service that carries a monthly fee, so I feel that I should be entitled to any quality prgrams they may offer. THanks for listening. Dave King
